Abstract

VSCHOOL—A Platform for Distance Learning

Professor Zhang Shiyong

Networking and Information Engineering Center
Fudan University, P.R.CHINA

VSCHOOL is a software platform for distance learning developed by Networking and Information Engineering Center (NiEC) of Fudan University, P.R.CHINA. Its overall design of the structure and functionalities are introduced first. Then some of the main components forming the key block of VSCHOOL, Teaching and Learning Platform, are discussed in detail. Finally, a case study, the teaching and learning activities at Network Education College of Fudan University is given.

Key Words distance learning, teaching and learning platform
