Hsiu-Ping Yueh is an associate professor of Department of Agricultural Extension and is directing the Division of E-Learning in the Computer and Information Network Center at National Taiwan University. Hsiu-Ping received her BS in Psychology at National Taiwan University Masters degrees in both Educational Psychology and Instructional Systems and Ph.D. degree in Instructional Systems and all from Pennsylvania State University in the United States. Her research interests include information communication, learning technology, assessment and evaluation.

Hsiu-Ping has worked on many projects of instructional design and educational technology since she studied in Penn State. After she joined National Taiwan University, she is actively involved in distance education and e-Learning projects that vary from different subject matters and technology applications. She also works closely with teachers of different school levels, from elementary, high school, and university faculties. To help promoting and facilitating the web-based instruction project in National Taiwan University, she initiated an Educational Technology Group under the Division of E-Learning in the Computer and Information Network Center and it has become a good instructional design practice for other schools to model from.
